

Scoring system for 2008 FCSA Series:

5-ocean / 6-river-spring / 6-river-fall series races; one throw out per series:

DNF = number that started the race

DNS, RAF = number that entered and came to race

DNC, DSQ = 1 + number that entered race

DNE = 1 + number entered in the series

Reasoning... DNF scores better than DNS by at least 1. DNS scores better than DNC and DSQ by 1. DNE is scored the same as for RRS A9 which assumes that everyone should show up for every race – not entering gets one more than all the entrants in the series.

This system will also give DNS and DNC credit to those who enter a race that is abandoned. (a variance from RRS, where a race must be scored to count in the series total).
