We did have a Werewolf on Sunday night. Three boats "registered". Caper was DNS – they never left the dock. Rapid Transit was DNF. They started and sailed just long enough to soak the sails. Easy Button did the job and made the course. See their account below. Please record Easy Button as First Place for this Werewolf Race. Hopefully we can do much better on the next one.

Yeah, we stuck it out. Had a pretty good screaming reach at one point in the rain and dark!
The sail back was pretty mellow.

Did you make it around the course Sunday night? It stopped being fun when the rain came and sucked up the wind. We sailed back. Congrats on first if you made the course. We have had so many good Werewolves. We knew there had to be a stinker at some point. Will try to get more boats out for the next one.

Let's get our boats out tonight for the Rudder Club Werewolf Race. Attached are the start times. We will do the "Full Wolf" course unless we change it in the starting area. Monitor VHF Channel 78. Full Wolf course is to start at "E", round "9" to port, round "5" to port, and then finish back at "E". See you tonight!
